

Datasheet: MCA2389SBR715

| Description: | RAT ANTI MOUSE Ly-6C:StarBright Red 715 |
|---------------|---|
| Specificity: | Ly-6C |
| Other names: | Lymphocyte antigen 6C2 |
| Format: | StarBright Red 715 |
| Product Type: | Monoclonal Antibody |
| Clone: | ER-MP20 |
| lsotype: | lgG2a |
| Quantity: | 100 TESTS/0.5ml |
| | |

Product Details

| Applications | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . | | | | | |
|-----------------|--|------------------|--------|------------------------|--------------------|--|
| | | Yes | No | Not Determined | Suggested Dilution | |
| | Flow Cytometry | - | | | Neat | |
| | Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls. | | | | | |
| Target Species | Mouse | | | | | |
| Product Form | Purified IgG conjugated to StarBright Red 715 - liquid | | | | | |
| Max Ex/Em | Fluorophore | Excitation Ma | x (nm) | Emission Max (nm) | | |
| | StarBright Red 715 | 638 | | 712 | | |
| Preparation | Purified IgG prepared supernatant | by affinity chro | matogr | aphy on Protein G fror | n tissue culture | |
| Buffer Solution | Phosphate buffered saline | | | | | |
| Preservative | 0.09% Sodium Azide (NaN ₃) | | | | | |
| Stabilisers | 1% Bovine Serum Albumin | | | | | |
| | 0.1% Pluronic F68 | | | | | |
| | 0.1% PEG 3350 | | | | | |
| | 0.05% Tween 20 | | | | | |

| Immunogen | Balb/c macrophage precursor cell hybrids. |
|----------------------------|---|
| External Database Links | UniProt: <u>P0CW03</u> <u>Related reagents</u> |
| Fusion Partners | Spleen cells from immunized rats were fused with cells of the Y3-Ag1.2.3 myeloma cell line. |
| Specificity | Rat anti Mouse Ly-6C antibody, clone ER-MP20 recognizes murine Ly-6C, a 131 amino acid ~14 kDa differentiation antigen, expressed on macrophage/dendritic cell precursors in mid-stage development (late CFU-M, monoblasts and immature monocytes), granulocytes, and on a wide range of endothelial cells and subpopulations of B- and T-lymphocytes. |
| | Rat anti Mouse Ly-6C antibody, clone ER-MP20 is able to distinguish multiple mouse blood monocyte subsets: immature Ly-6C ^{hi} monocytes are recruited to acute peripheral inflammation and develop into Ly-6C ⁺ exudate macrophages, whereas more mature Ly-6C ^{-/lo} monocytes are precursors for tissue macrophages and dendritic cells in steady state. |
| | Rat anti Mouse Ly-6C, clone ER-MP20 can be used in conjunction with clone <u>ER-MP12</u> in two colour flow cytometric analysis, to identify different stages of myeloid progenitor cells in mouse bone marrow (<u>Leenen <i>et al.</i> 1990</u>). |
| | Rat anti Mouse Ly-6C was originally described as recognizing a protein encoded by the LY6C gene. It has subsequently become apparent that the LY6C locus demonstrates polymorphism and the LY6C gene has been re-designated <u>LY6C2</u> . The <u>LY6C1</u> gene encodes a similar protein with ~95% sequence homology to LY6C2. |
| Flow Cytometry | Use 5µl of the suggested working dilution to label 10 ⁶ cells in 100µl. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application. |
