

Datasheet: MCA2403EL

### **BATCH NUMBER 150548**

Description:	MOUSE ANTI HUMAN MICA/MICB:Low Endotoxin		
Specificity:	MICA/MICB		
Format:	Low Endotoxin		
Product Type:	Monoclonal Antibody		
Clone:	6D4		
lsotype:	lgG2a		
Quantity:	0.5 mg		

# **Product Details**

### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry				
Immunohistology - Frozen	•			1/100
Immunohistology - Paraffin				
ELISA				
Immunoprecipitation	•			
Western Blotting				
Functional Assays				

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Human	
Product Form	Purified IgG - liquid	
Preparation	Purified IgG prepared by affinity chromatography on Protein C supernatant	From tissue culture
Buffer Solution	Phosphate buffered saline	
Preservative Stabilisers	None present	

Carrier Free	Yes				
Endotoxin Level	< 0.01 EU/ug				
Approx. Protein Concentrations	lgG concentration 1.0 mg/ml				
Immunogen	MICA transfected C1R cells.				
External Database Links	UniProt:				
	Q29980 Related reagents Q29983 Related reagents				
	Entrez Gene:				
	4277 MICB Related reagents				
	100507436 MICA Related reagents				
Synonyms	PERB11.1, PERB11.2				
RRID	AB_620223				
Fusion Partners	Spleen cells from immunised RBF/DnJ mice were fused with cells of the P3 mouse myeloma cell line.				
Specificity	Mouse anti Human MICA/Micb antibody, clone 6D4 recognizes non-classical MHC class I chain A (MICA) and non-classical MHC class I chain MICB (MICB).				
	MICA and MICB are stress inducible antigens, which are closely related and appear functionally indistinguishable. MICA and MICB are ligands for NKG2D, an activating receptor on most natural killer (NK) cells, CD8 T cells and gamma delta T cells.				
	MICA is principally expressed on intestinal epithelium, and several epithelial tumors. Expression may be induced to high surface levels by heat shock, oxidative stress, and virus infection.				
	Clone 6D4 is reported to inhibit the cytotoxicity of NK cells stimulated by IFN alpha-treated dendritic cells ( <u>Jinushi et al. 2003</u> ).				
Flow Cytometry	Use 10ul of the suggested working dilution to label 1x10 <sup>6</sup> cells in 100ul.

#### **Storage**

Store at -20°C only.

Storage in frost-free freezers is not recommended.

This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10162 available at: <a href="https://www.bio-rad-antibodies.com/SDS/MCA2403EL">https://www.bio-rad-antibodies.com/SDS/MCA2403EL</a> 10162
