<b>Specificity</b>	<p><b>Mouse anti Human CD244 antibody, clone 2B4.69</b> recognizes the CD244 cell surface antigen, also known as natural killer receptor 2B4 (NKG2B4). CD244 is a 370 amino acid single pass type I transmembrane glycoprotein with two <a href="#">Ig-like V type</a> domains. CD244 is a member of the SLAM family of receptors expressed on natural killer (NK) cells, gamma delta T cells, CD14+ monocytes, and a subset of CD8+ T cells.</p> <p>CD244 was originally identified as an activating receptor on NK cells, The receptor may have a wide range of activities including NK cell activation, co-stimulation, or even inhibition, depending on the cell type and stage of differentiation. The ligand of CD244 is <a href="#">CD48</a>, a GPI-anchored membrane protein also belonging to the SLAM family.</p>
<b>Flow Cytometry</b>	Use 10ul of the suggested working dilution to label $1 \times 10^6$ cells in 100ul.
