

Datasheet: MCA2459PET BATCH NUMBER 165696

Description:	MOUSE ANTI HUMAN CD138:RPE
Specificity:	CD138
Other names:	SYNDECAN-1
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	B-A38
Isotype:	lgG1
Quantity:	25 TESTS

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes No	Not Determined	Suggested Dilution			
	Flow Cytometry	-		Neat - 1/5			
	Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.						
Target Species	Human						
Product Form	Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized						
Reconstitution	Reconstitute with 0.25 ml distilled water						
Max Ex/Em	Fluorophore	Excitation Max (n	m) Emission Max (nm)				
	RPE 488nm laser	496	578				
Preparation	Purified IgG prepared by ion exchange chromatography from tissue culture supernatant						
Buffer Solution	Phosphate buffered sali	ne					
Preservative Stabilisers	0.09% Sodium Azide 1% Bovine Serum Al 5% Sucrose	lbumin					

Immunogen	U266 cell line.				
External Database Links	UniProt: <u>P18827</u> <u>Related reagents</u> Entrez Gene: <u>6382</u> SDC1 <u>Related reagents</u>				
Synonyms	SDC				
RRID	AB_2238768				
Fusion Partners	Spleen cells from immunized Balb/c (Iffa Credo) mice were fused with cells of the mouse X63/Ag.8653 myeloma cell line.				
Specificity	 Mouse anti human CD138 antibody, clone B-A38 recognizes human CD138, also known as Syndecan-1 (SDC-1). CD138 is a member of the transmembrane heparan sulfate proteoglycan family (O'Connell <i>et al.</i> 2004, Sanderson <i>et al.</i> 2008). It is composed of a core protein (comprising 3 domains; a short cytoplasmic domain, a transmembrane domain, and a long extracellular domain) and covalently attached heparan sulfate chains (Sanderson <i>et al.</i> 2008). Syndecan-1 is expressed on the surface of plasma cells within the hematopoietic system and on the surface of mature epithelial cells (O'Connell <i>et al.</i> 2004). It acts as an extracellular matrix receptor, involved in many cellular functions, including cell binding, cell signaling and cytoskeletal organization through cell-cell adhesion and cell-matrix adhesion (Sanderson <i>et al.</i> 2008). 				
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul.

Storage	Prior to reconstitution store at +4°C. After reconstitution store at +4°C. DO NOT FREEZE. This product should be stored undiluted. This product is photosensitive and should be protected from light. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #20487 available at: https://www.bio-rad-antibodies.com/SDS/MCA2459PET 20487
Regulatory	For research purposes only
