

## Datasheet: MCA2472 BATCH NUMBER 153685

| Description:  | MOUSE ANTI PHOSPHOTYROSINE |
|---------------|----------------------------|
| Specificity:  | PHOSPHOTYROSINE            |
| Format:       | Purified                   |
| Product Type: | Monoclonal Antibody        |
| Clone:        | PY20                       |
| lsotype:      | lgG2b                      |
| Quantity:     | 0.5 mg                     |

# **Product Details**

| Applications                   | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . |      |    |                |                    |  |
|--------------------------------|--|------|----|----------------|--------------------|--|
|                                |  | Yes  | No | Not Determined | Suggested Dilution |  |
|                                | Flow Cytometry   |      |    | •              |                    |  |
|                                | Immunohistology - Frozen   |      |    |                |                    |  |
|                                | Immunohistology - Paraffin   |      |    | •              |                    |  |
|                                | ELISA  | •    |    |                | 100ng/ml           |  |
|                                | Immunoprecipitation  |      |    |                |                    |  |
|                                | Western Blotting   | •    |    |                | 2ug/ml             |  |
|                                | Immunofluorescence   | •    |    |                |                    |  |
|                                | necessarily exclude its use in such procedures. Suggested working dilutions are ging<br>a guide only. It is recommended that the user titrates the antibody for use in their of<br>system using appropriate negative/positive controls.  |      |    |                |                    |  |
| Target Species<br>Product Form | Chemical<br>Purified IgG - liquid  |      |    |                |                    |  |
| Preparation                    | Purified IgG prepared by affinity chromatography.  |      |    |                |                    |  |
| Buffer Solution                | Borate buffered saline   |      |    |                |                    |  |
| Preservative<br>Stabilisers    | 0.09% Sodium Azide   |      |    |                |                    |  |
| Approx. Protein                | lgG concentration 0.5 mg   | g/ml |    |                |                    |  |

#### Concentrations

| RRID                             | AB_567398   |  |  |  |  |
|----------------------------------|---|--|--|--|--|
| Specificity                      | <b>Mouse anti Phosphotyrosine antibody, clone PY20</b> recognizes phosphotyrosine,<br>enabling the detection, characterisation and isolation of proteins containing<br>phosphorylated tyrosine residues.  |  |  |  |  |
|                                  | The phosphorylation of tyrosine acts as a important signal in the control of cell mitogenesis, differentiation, proliferation, and migration and occurs following the activation of intracellular tyrosine kinases, including the T-cell receptor (TCR), epidermal growth factor (EGF) and many families of receptor and non-receptor protein tyrosine kinases (PTKs), which catalyse the transfer of ATP to a tyrosine residue on specific cell protein targets.   |  |  |  |  |
|                                  | The binding of PY20 to phosphorylated tyrosines can be inhibited by free phosphotyrosine and phenylphosphate, but not by free phosphate, phosphoserine or phosphothreonine.   |  |  |  |  |
|                                  | The affinity of PY20 for phosphotyrosine is $10^{-6}$ to $10^{-7}$ M.   |  |  |  |  |
| References                       | <ol> <li>Ruff-Jamison, S. <i>et al.</i> (1991) Heavy and light chain variable region sequences and<br/>antibody properties of anti-phosphotyrosine antibodies reveal both common and distinct<br/>features. <u>J Biol Chem. 266 (10): 6607-13.</u></li> <li>Takagi, S. <i>et al.</i> (1991) Intracellular localization of tyrosine kinase substrates beneath<br/>crosslinked surface immunoglobulins in B cells. <u>J Exp Med. 174 (2): 381-8.</u></li> <li>Glenney, J.R. | Storage                          | Store at +4°C or at -20°C if preferred.<br>Storage in frost-free freezers is not recommended.<br>This product should be stored undiluted. Avoid repeated freezing and thawing as this may<br>denature the antibody. Should this product contain a precipitate we recommend<br>microcentrifugation before use.   |  |  |  |  |
