

### Datasheet: MCA2486

Description:	MOUSE ANTI HUMAN MCP-1			
Specificity:	MCP-1			
Other names:	CCL2			
Format:	Purified			
Product Type:	Monoclonal Antibody			
Clone:	2.2-4H5-1A11			
lsotype:	lgG1			
Quantity:	0.5 mg			

# **Product Details**

#### Applications This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.biorad-antibodies.com/protocols.

		Yes	No	Not Determined	Suggested Dilution

Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml after reconstitution
Immunogen	Recombinant human MCP-1/MCAF ( PHP061)
External Database Links	UniProt: <u>P13500</u> <u>Related reagents</u>
	Entrez Gene: 6347 CCL2 Related reagents
Synonyms	MCP1, SCYA2
RRID	AB_2071556
Fusion Partners	Spleen cells from immunized BALB/c X ICR $F_1$ mice were fused with cells of a mouse myeloma cell line.
Specificity	<b>Mouse anti Human MCP-1 antibody, clone 2.2-4H5-1A11</b> recognizes human C-C motif chemokine 2, also known as Monocyte chemoattractant protein 1 (MCP-1), Monocyte chemotactic and activating factor, Monocyte secretory protein JE, Small-inducible cytokine A2 or CCL2, and does not cross react with MCP-2, MCP-3 or other structurally related chemokines. MCP-1 is a 99 amino acid, including a 23 aa signal peptide ~13 kDa chemotactic protein, a chemoattractant for monocytes and basophils but not neutrophils or eosinophils (Weber <i>et al.</i> 1996).
	MCP-1 is produced by a number of cell types, including monocytes, macrophages, microglia, fibroblasts and epithelial cells ( <u>Cushing <i>et al.</i> 1990</u> ). MCP-1 influences T-cell immunity polarizing responses towards the Th2 phenotype ( <u>Karpus and Kennedy 1997</u> ). Variations in the CCL2 gene affects susceptibility to <i>Mycobacteriun tuberculosis</i> infection ( <u>Flores-Villanueva <i>et al.</i> 2005</u> ). Mouse anti Human MCP-1 antibody, clone 2.2-4H5-1A11 recognizes both native MCP-1
	and recombinant MCP-1
ELISA	This product may be used in an indirect ELISA or as a capture antibody in a sandwich ELISA together with <u>PHP061</u> as the standard.

Histology Positive Control Tissue	Human Breast Invasive Ductal Carcinoma
Western Blotting	This product may be used under either reducing or non-reducing conditions together with <u>PHP061</u> as the positive control.
References	<ol> <li>Johansson, U. <i>et al.</i> (2008) Formation of composite endothelial cell-mesenchymal stem cell islets: a novel approach to promote islet revascularization. <u>Diabetes. 57: 2393-401.</u></li> <li>Nio-Kobayashi J <i>et al.</i> (2015) Regulated C-C motif ligand 2 (CCL2) in luteal cells contributes to macrophage infiltration into the human corpus luteum during luteolysis. <u>Mol Hum Reprod. pii: gav028.</u></li> <li>Chuang, L.P. <i>et al.</i> (2016) Increased MCP-1 gene expression in monocytes of severe OSA patients and under intermittent hypoxia. <u>Sleep Breath. 20 (1): 425-33.</u></li> </ol>
Storage	This product is shipped at ambient temperature. Prior to reconstitution store at -20°C. After reconstitution store at -20°C. This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10294 available at: https://www.bio-rad-antibodies.com/SDS/MCA2486 10294
Regulatory	For research purposes only
