

# Datasheet: MCA2497F BATCH NUMBER 1803

| Description:  | MOUSE ANTI HUMAN HLA DP DQ DR:FITC |
|---------------|------------------------------------|
| Specificity:  | HLA DP DQ DR                       |
| Format:       | FITC                               |
| Product Type: | Monoclonal Antibody                |
| Clone:        | Bu26                               |
| Isotype:      | lgG1                               |
| Quantity:     | 0.1 mg                             |

## **Product Details**

| Applications                      | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u> rad-antibodies.com/protocols. |                       |        |                         |                    |  |  |  |
|-----------------------------------|--|-----------------------|--------|-------------------------|--------------------|--|--|--|
|                                   |  | Yes                   | No     | Not Determined          | Suggested Dilution |  |  |  |
|                                   | Flow Cytometry   | •                     |        |                         | Neat - 1/10        |  |  |  |
|                                   | Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.   |                       |        |                         |                    |  |  |  |
| Target Species                    | Human  |                       |        |                         |                    |  |  |  |
| Product Form                      | Purified IgG conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid   |                       |        |                         |                    |  |  |  |
| Max Ex/Em                         | Fluorophore<br>FITC  | Excitation Max<br>490 | : (nm) | Emission Max (nm<br>525 | )                  |  |  |  |
| Preparation                       | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant  |                       |        |                         |                    |  |  |  |
| Buffer Solution                   | Phosphate buffered saline  |                       |        |                         |                    |  |  |  |
| Preservative<br>Stabilisers       | 0.09% Sodium Azide (NaN <sub>3</sub> )<br>1% Bovine Serum Albumin  |                       |        |                         |                    |  |  |  |
| Approx. Protein<br>Concentrations | IgG concentration 0.1r   | mg/ml                 |        |                         |                    |  |  |  |

| RRID                             | AB_906084   |
|----------------------------------|---|
| Specificity                      | <b>Mouse anti Human HLA DP DQ DR antibody, clone Bu26</b> reacts with DP, DQ and DR beta chains, which are expressed by antigen presenting cells, B cells, monocytes and activated T lymphocytes.   |
|                                  | The major histocompatibility complex (MHC) is a cluster of genes that are important in the immune response to infections. In humans, this complex is referred to as the human leukocyte antigen (HLA) region. There are 3 major MHC class II proteins encoded by the HLA which are HLA DP, HLA DQ and HLA DR.   |
| Flow Cytometry                   | Use 10ul of the suggested working dilution to label $1 \times 10^{6}$ cells in 100ul.   |

| Storage                          | Store at +4°C or at -20°C if preferred.<br>Storage in frost-free freezers is not recommended.<br>This product should be stored undiluted. This product is photosensitive and should be<br>protected from light.<br>Avoid repeated freezing and thawing as this may denature the antibody. Should this<br>product contain a precipitate we recommend microcentrifugation before use.   |
| Guarantee                        | 12 months from date of despatch   |
| Health And Safety<br>Information | Material Safety Datasheet documentation #10041 available at:<br>https://www.bio-rad-antibodies.com/SDS/MCA2497F<br>10041  |
| Regulatory                       | For research purposes only  |
