

Datasheet: MCA2518PE

## **BATCH NUMBER 151278**

Description:	MOUSE ANTI HUMAN CD172a:RPE
Specificity:	CD172a
Other names:	SIRP ALPHA
Format:	RPE
<b>Product Type:</b>	Monoclonal Antibody
Clone:	15-414
Isotype:	lgG2a
Quantity:	100 TESTS

# **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human			
Product Form	Purified IgG conjuga	ated to R. Phycoerythrin	(RPE) - lyophilized	
Reconstitution	Reconstitute with 1.	0ml distilled water.		
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)	
	RPE 488nm laser	496	578	
Preparation	Purified IgG prepare supernatant	ed by affinity chromatog	raphy on Protein G from tissu	e culture
Buffer Solution	Phosphate buffered	saline		
Preservative	0.09% Sodium Azid	le (NaN <sub>3</sub> )		
Stabilisers	1% Bovine Seru	m Albumin		

	5% Sucrose				
Immunogen	Monocyte-derived dendritic cells.				
External Database	UniProt:				
Links	P78324 Related reagents				
	Entrez Gene:				
	140885 SIRPA Related reagents				
Synonyms	BIT, MFR, MYD1, PTPNS1, SHPS1, SIRP				
RRID	AB_2188053				
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the X63-Ag8.653 myeloma cell line.				
Specificity	Mouse anti Human CD172a antibody, clone 15-414 recognizes human CD172a, also known as signal-regulatory protein alpha, a receptor-type transmembrane glycoprotein expressed on cells of myeloid origin, including granulocytes, dendritic cells (DCs), macrophages, mast cells and haematopoietic stem cells.				
	CD172a acts as a substrate for several activated tyrosine kinases, including EGFR, PDGFR, src and insulin receptor and is involved in the negative regulation of receptor tyrosine kinase-coupled signaling pathways. Ligand binding of CD172a to integrinassociated protein CD47, results in tyrosine kinase phosphorylation of immunoreceptor tyrosine-based inhibitory motifs (ITIMs) within the cytoplasmic region of CD172a, mediating the recruitment and activation of the tyrosine phosphatases SHP-1 and SHP-2. These then act as regulators of cellular function, through dephosphorylation of specific substrates. Ligation of CD172a with CD47 has been demonstrated in several regulatory processes, including the inhibition of host cell phagocytosis by macrophages and the bi-directional activation of T cells and DCs.				
Flow Cytometry	Use 10ul of the suggested working dilution to label 1x10 <sup>6</sup> cells in 100ul.
