Product Details

**RRID**

AB_808361

**Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

**Target Species**

Viral

**Product Form**

Purified IgG - liquid

**Preparation**

Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant

**Buffer Solution**

Phosphate buffered saline

**Preservative Stabilisers**

0.1% Sodium Azide (NaN₃)

**Approx. Protein Concentrations**

IgG concentration 0.1mg/ml

**Immunogen**

Canine parvo virus.

**Specificity**

*Mouse anti Canine Parvovirus antibody, clone 7351* recognizes Canine parvovirus (CPV), a
negatively stranded DNA virus which infects dogs. In some instances it is also known as CPV type-2 to distinguish it from the unrelated parvovirus minute virus of canines (MVC).

CPV is a relatively new virus, having been first isolated in 1978, which is thought to have derived from the feline panleukopenia virus (FPV). CPV is highly infectious and is spread from dog to dog by physical contact and contact with feces.

Storage
Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee
18 months from date of despatch.
