

Datasheet: MCA2598A488

**BATCH NUMBER 0113**

|                      |                                       |
|----------------------|---------------------------------------|
| <b>Description:</b>  | MOUSE ANTI PIG CD117:Alexa Fluor® 488 |
| <b>Specificity:</b>  | CD117                                 |
| <b>Other names:</b>  | C-KIT                                 |
| <b>Format:</b>       | ALEXA FLUOR® 488                      |
| <b>Product Type:</b> | Monoclonal Antibody                   |
| <b>Clone:</b>        | 2B8/BM                                |
| <b>Isotype:</b>      | IgG1                                  |
| <b>Quantity:</b>     | 100 TESTS/1ml                         |

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

|                | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|--------------------|
| Flow Cytometry | ▪   |    |                | Neat               |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

|                                 |   |                            |                          |
|---------------------------------|---|----------------------------|--------------------------|
| <b>Target Species</b>           | Pig   |                            |                          |
| <b>Product Form</b>             | Purified IgG conjugated to Alexa Fluor® 488 - liquid  |                            |                          |
| <b>Max Ex/Em</b>                | <b>Fluorophore</b>  | <b>Excitation Max (nm)</b> | <b>Emission Max (nm)</b> |
|                                 | Alexa Fluor®488   | 495                        | 519                      |
| <b>Preparation</b>              | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant |                            |                          |
| <b>Buffer Solution</b>          | Phosphate buffered saline   |                            |                          |
| <b>Preservative Stabilisers</b> | 0.09% Sodium Azide (NaN <sub>3</sub> )<br>1% Bovine Serum Albumin                             |                            |                          |
| <b>Approx. Protein</b>          | IgG concentration 0.05mg/ml   |                            |                          |

## Concentrations

---

**Immunogen** Porcine bone marrow cells (BMC).

---

## External Database Links

### UniProt:

[Q2HWD6](#)    [Related reagents](#)

### Entrez Gene:

---

**RRID** AB\_1125233

---

**Fusion Partners** Spleen cells from immunised Balb/c mouse were fused with cells of the Sp2/0 myeloma cell line.

---

**Specificity** **Mouse anti Pig CD117, clone 2B8/BM** is specific for porcine CD117, also known as c-kit, a 155 kDa type I transmembrane protein with protein tyrosine kinase activity, which plays an important role in early hematopoiesis ([Perez et al. 2007](#)).

Hematopoietic stem cells (HSC) of bone marrow have multilineage differentiation potential and an extensive capacity for self-renewal. The majority of adult bone marrow hematopoietic progenitor cells are CD117+ and have been used successfully in xenograft transplantation models for long term survival of grafts, without symptoms of graft-versus-host disease (GVHD).

Mouse anti pig CD117, clone 2B8/BM recognizes CD117 on a small subset of porcine bone marrow progenitor cells and therefore provides an alternative tool from the previously used c-kit ligand stem cell factor, for the isolation and enrichment of porcine stem cells.

---

**Flow Cytometry** Use 10ul of the suggested working dilution to label  $1 \times 10^6$  cells in 100ul.

---

**Storage** Store at +4°C or at -20°C if preferred.  
Storage in frost-free freezers is not recommended.  
This product should be stored undiluted. This product is photosensitive and should be protected from light. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
