

Datasheet: MCA2599F

Description:	MOUSE ANTI PIG GRANULOCYTES:FITC
Specificity:	GRANULOCYTES (NEUTROPHIL LINEAGE)
Format:	FITC
Product Type:	Monoclonal Antibody
Clone:	6D10
Isotype:	IgG2a
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat - 1/5

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Pig		
Product Form	Purified IgG conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid		
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)
	FITC	490	525
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant		
Buffer Solution	Phosphate buffered saline		
Preservative	0.09% Sodium Azide (NaN ₃)		
Stabilisers	1% Bovine Serum Albumin		
Approx. Protein Concentrations	IgG concentration 0.1mg/ml		
Immunogen	Porcine bone marrow haematopoietic cells (BMHC).		
RRID	AB_1102599		
Fusion Partners	Spleen cells from immunised Balb/c mouse were fused with cells of the SP2/0 mouse myeloma cell line.		

Specificity **Mouse anti Pig Granulocytes antibody, clone 6D10** recognizes a ~60 kDa antigen on porcine granulocytes of the neutrophil lineage, acting as a reliable tool for their analysis and isolation, without contamination from other cells.

Expression of the antigen recognized by clone 6D10 decreases from the immature promyelocytes, through myelocytes and metamyelocytes, to the mature neutrophils, thereby enabling the identification of neutrophil developmental stages. Furthermore, use of clone 6D10 in conjunction with clone 2B2 ([MCA2600](#)), allows for the discrimination and characterisation of different porcine granulocyte lineages and also their developmental stages: 6D10⁻2B2⁻ early myeloid precursors, 6D10⁺2B2⁻ immature neutrophils, 6D10⁺2B2⁺ mature neutrophils and 6D10⁻2B2⁺ mature eosinophils and basophils.

Mouse anti Pig Granulocytes antibody, clone 6D10 has been shown as suitable for use on cytopspins ([Perez et al. 2007](#)).

Flow Cytometry Use 10ul of the suggested working dilution to label 1x10⁶ cells in 100ul.

Storage Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. This product is photosensitive and should be protected from light. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
