Specificity	<p>Mouse anti human Cystatin C antibody, clone Cyst24 detects human Cystatin C, a member of the type 2 cystatin superfamily. Cystatin C is a potent inhibitor of cysteine proteinases, both endogenous (lysosomal cathepsins), and pathogenic. Cystatin C is a ~13 kDa secreted protein which is found in high concentrations in biological fluids and is thought to be expressed by all human nucleated cells.</p> <p>Changes in cystatin C have been documented in a number of cardiovascular diseases, including atherosclerosis, amyloid angiopathy and myocardial infarction. Its low molecular weight also means that cystatin C can be used as a marker of renal failure.</p>
