<b>Specificity</b>	<p><b>Mouse anti Human C9 antibody, clone 002-94.8.8</b> recognises complement component 9 (C9), a 71 kDa member of the complement C6/C7/C8/C9 family present in the blood serum and synthesised by the liver and monocytes. C9 is the last component to be added during the formation of the membrane attack complex (MAC), binding the membrane associated C5b-8 complex and resulting in the circular polymerisation of 12-18 C9 molecules. This forms the hydrophilic transmembrane channel which causes cell lysis. Deficiency of C9 is associated with recurring infections by <i>Neisseria meningitides</i>.</p> <p>Mouse anti Human C9 antibody, clone 002-94.8.8 does not recognise MAC.</p>

<b>Storage</b>	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
