

Datasheet: MCA2670

Description:	MOUSE ANTI NEWCASTLE DISEASE VIRUS
Specificity:	NEWCASTLE DISEASE VIRUS
Other names:	NDV
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	9F7
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting			▪	
Immunoassay			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Viral
Product Form	Purified IgG- liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein	IgG concentration 1.0mg/ml

Concentrations

Immunogen	Glycoprotein haemagglutinin-neuraminidase of Newcastle Disease Virus (La-Sota strain).
RRID	AB_844555
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the Sp2/0 myeloma cell line.

Specificity **Mouse anti Newcastle Disease Virus antibody, clone 9F7** detects the La-Sota strain of the Newcastle Disease Virus (NDV), a highly contagious avian virus which is of major economic importance to the poultry industry. NDV is a member of the Paramyxoviridae family, and has a single stranded, negative sense RNA genome.

NDV infects via mucosal surfaces of the respiratory and alimentary tract, and its strains can be categorized in accordance to their virulence, from low virulence and mild symptoms (lentogenic), to intermediate forms (mesogenic), through to highly virulent (velogenic) strains which can cause up to 90% mortality. La-Sota is a lentogenic strain, and can be used as a live vaccine.

NDV selectively kill human tumor cells ([Reichard *et al.* 1992](#)).

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee	12 months from date of despatch
