

Datasheet: MCA2692A700T

Description:	HUMAN LINEAGE COCKTAIL:Alexa Fluor® 700
Specificity:	LINEAGE COCKTAIL
Format:	ALEXA FLUOR® 700
Product Type:	Monoclonal Antibody Panel
Clone:	UCHT1 / TUK4 / DJ130c / LT19 / 2H7 / 123C3
Isotype:	Cocktail
Quantity:	25 TESTS/0.25ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Antibody Isotypes	IgG1/IgG2a/IgG1/IgG1/IgG2b/IgG1		
Target Species	Human		
Product Form	Purified IgG conjugated to Alexa Fluor® 700 - liquid		
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)
	Alexa Fluor®700	702	723
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant		
Buffer Solution	Phosphate buffered saline		
Preservative	0.09% Sodium Azide		
Stabilisers	1% Bovine Serum Albumin		
Approx. Protein	IgG concentration 0.05mg/ml		

Concentrations

RRID AB_1102726

Specificity **Human Lineage Cocktail:Alexa Fluor® 700** is a cocktail of antibodies recognising all leucocytes in human peripheral blood, with the exception of dendritic cells and basophils. Dendritic cells in peripheral blood are characterised by the phenotype HLA-DR+ve, Lineage Cocktail -ve. Basophils are HLA-DR -ve. Human Lineage Cocktail:Alexa Fluor® 700 may therefore be used in combination with HLA-DR specific antibodies (e.g. [MCA1879PE](#)) to identify peripheral blood dendritic cells.

The individual antibodies in this cocktail are specific for cell subsets as follows:-

CD3 T lymphocytes
CD14 Monocytes
CD16 NK cells, granulocytes
CD19 B lymphocytes
CD20 B lymphocytes
CD56 NK cells

Flow Cytometry Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul.

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.

Guarantee 12 months from date of despatch

Acknowledgements This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchase product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research.
