

Datasheet: MCA2696

Description:	MOUSE ANTI HUMAN ALPHA A CRYSTALLIN
Specificity:	ALPHA A CRYSTALLIN
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	c9F2
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

RRID AB_906002

Applications This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			■	
Immunohistology - Frozen			■	
Immunohistology - Paraffin			■	
ELISA	■			
Immunoprecipitation			■	
Western Blotting	■			1/1000 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species Human

Species Cross Reactivity Reacts with: Rat
N.B. Antibody reactivity and working conditions may vary between species.

Product Form Purified IgG - liquid

Preparation Purified IgG prepared by affinity chromatography on Protein G

Buffer Solution Phosphate buffered saline

Preservative Stabilisers 0.02% Sodium Azide (NaN₃)
10% Glycerol

Approx. Protein Concentrations IgG concentration 1.0mg/ml

Immunogen	<i>E. coli</i> -derived recombinant protein corresponding to full-length (aa1-173) human crystallin alpha A.
External Database Links	<p>UniProt: P02489 Related reagents</p> <p>Entrez Gene: 1409 CRYAA Related reagents</p>
Synonyms	CRYA1, HSPB4
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the mouse Sp2/0 myeloma cell line.
Specificity	<p>Mouse anti Human Alpha A Crystallin antibody, clone c9F2 recognizes alpha A crystallin, a 20 kDa water-soluble major structural protein and member of the heat shock protein family, designated HSPB4, which acts as a molecular chaperone and is believed to play a role in the maintenance of ocular lens transparency/refractive index.</p> <p>Besides the involvement of both alpha A and alpha B crystallin in the prevention of protein precipitation and cataract formation in the eye, alpha crystallins have also been demonstrated in other tissues including the heart, brain, kidney, spleen and thymus.</p>
Further Reading	1. Andley UP <i>et al.</i> (1996) Cloning, expression, and chaperone-like activity of human alphaA-crystallin. J Biol Chem. 271 (50): 31973-80.
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	18 months from date of despatch.
Health And Safety Information	Material Safety Datasheet documentation #10049 available at: 10049: https://www.bio-rad-antibodies.com/uploads/MSDS/10049.pdf
Regulatory	For research purposes only
