<b>Specificity</b>	<p><b>Mouse anti Influenza B Nucleoprotein antibody, clone B114</b> recognises a species specific conserved epitope within the nucleoprotein of influenza B virus.</p> <p>The influenza viruses, classified as type A, B and C, are members of the <i>Orthomyxoviridae</i> family which differ in their epidemiology and host ranges and lack serological cross-reactivity of their internal components, especially their matrix proteins and nucleoprotein. Influenza B virus is a slow-mutating single stranded RNA virus subject to antigenic drift which, although enough to prevent lasting immunity, prevents influenza B from causing pandemics.</p> <p>Mouse anti Influenza B Nucleoprotein antibody, clone B114 can be used in influenza B IFA typing in conjunction with <a href="#">MCA403</a> (clone B017).</p>
