

Datasheet: MCA2725

BATCH NUMBER 158687

Description:	MOUSE ANTI PIG SURFACTANT PROTEIN D
Specificity:	SURFACTANT PROTEIN D
Other names:	SP-D
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	1.7
Isotype:	IgG1
Quantity:	0.25 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			1µg/ml
Immunohistology - Paraffin (1)	▪			
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)This product requires antigen retrieval using heat treatment prior to staining of paraffin sections.

TRIS/EDTA buffer pH8.0 is recommended for this purpose.

Target Species	Pig
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A

Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	Purified porcine surfactant protein D.
External Database Links	<p>UniProt: Q9N1X4 Related reagents</p> <p>Entrez Gene: 397198 SFTPD Related reagents</p>
RRID	AB_10544550
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the P3X63Ag.8.653 myeloma cell line.
Specificity	Mouse anti Porcine surfactant protein D antibody, clone 1.7 detects porcine surfactant protein D (pSP-D), a ~138 kDa member of the collectin family of proteins. Surfactant protein D is thought to play a significant role in the innate immune response against microorganisms within the lungs and at other mucosal surfaces. SP-D is a multifunctional protein which binds selectively to saccharides and lipids on microbial surfaces promoting antimicrobial responses and regulating surfactant lipid homeostasis. SP-D expression is induced in lung surfactant in response to aerogenous bacterial infection, and upon binding to bacteria, promotes phagocytosis and antigen presentation by dendritic cells. pSP-D may serve as a serum biomarker specific for bronchopneumonia in pigs (Kahlisch <i>et al.</i> 2009).
Histology Positive Control Tissue	Porcine lung tissue
Western Blotting	MCA2725 detects a band of approximately 138kDa.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee	12 months from date of despatch
