

Datasheet: MCA2759

BATCH NUMBER 151837

Description:	MOUSE ANTI HUMAN FIBRINOPEPTIDE A
Specificity:	FIBRINOPEPTIDE A
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	49D2
Isotype:	IgG2a
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting			▪	
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)

Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	Synthetic fibrinopeptide A conjugated to a carrier protein.
External Database Links	<p>UniProt: P02671 Related reagents</p> <p>Entrez Gene: 2243 FGA Related reagents</p>
RRID	AB_1055721
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the Sp2/0 myeloma cell line.
Specificity	<p>Mouse anti Human Fibrinopeptide A antibody, clone 49D2 recognizes human fibrinopeptide A, a 16aa sequence found on the alpha chain of fibrinogen. The fibrinopeptides (A and B, from the alpha and beta chains of fibrinogen, respectively) serves to prevent fibrinogen from polymerising with itself. Following vascular injury, thrombin cleaves through the fibrinopeptides, which exposes the N terminal polymerisation sites, to allow formation of a blood clot.</p> <p>Mouse anti Human Fibrinopeptide A antibody, clone 49D2 recognizes the fibrinopeptide region in the alpha-chain of fibrinogen (amino acids 20-35) and free fibrinopeptide A.</p>
Storage	<p>Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA2759 10040
Regulatory	For research purposes only
