<b>Specificity</b>	<p><b>Mouse anti Human IFN beta antibody, clone BB4</b> recognizes human interferon beta (IFN Beta), a ~22 kDa cytokine with wide-ranging antiviral, antimicrobial and antitumor effects. Interferons also serve to activate macrophages, natural killer cells and the presentation of antigens to the immune system by the major histocompatibility complex. The production of interferon is induced in response to microbes and other cytokines. The interferons are widely used to treat a variety of diseases and IFNB in particular is used to treat relapsing-remitting multiple sclerosis.</p> <p>Mouse anti Human IFN beta antibody, clone BB4 recognizes glycosylated and non-glycosylated human IFN<math>\beta</math> and there is no cross-reactivity with human interferon alpha or human interferon gamma.</p>
<b>Storage</b>	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody.
