Datasheet: MCA2765

Description:	MOUSE ANTI HUMAN LOX-1 (SOLUBLE)
Specificity:	LOX-1 (SOLUBLE)
Other names:	OLR1
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	LOX19-22
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			
Functional Assays			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN_3)

Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	Recombinant soluble LOX-1 expressed in *E.coli*.
External Database Links	**UniProt:** P78380 Related reagents **Entrez Gene:** 4973 OLR1 Related reagents
Synonyms	CLEC8A, LOX1
RRID	AB_1102730
Fusion Partners	Spleen cells from immunised Balb/c were fused with cells of the Sp2/0 myeloma cell line.
Specificity	**Mouse anti Human LOX-1 (Soluble) antibody, clone LOX19-22** recognizes the lectin-like oxidised low-density lipoprotein (LDL) receptor (LOX-1), a 31kDa protein of the C-type lectin superfamily. This receptor mediates the recognition, internalisation and degradation of oxidised LDL. It is a Type II membrane protein with a typical C-type lectin structure at the extracellular C-terminus which recognizes the ligand. LOX-1 activation by oxidised LDL causes endothelial changes such as decreased nitric oxide release and an increased expression of adhesion molecules. LOX-1 also binds activated platelets and apoptotic cells. The expression of LOX-1 is induced by proatherogenic conditions such as hyperlipidemia, hypertension and diabetes and as such appears to contribute to the pathogenesis of vascular disorders, particularly atherosclerosis. It can be cleaved by an unknown protease at the extracellular juxtamembrane region to release the soluble form (aa58-273) of LOX-1, recognized by Mouse anti Human LOX-1 (Soluble) antibody, clone LOX19-22.
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA2765 10040
Regulatory	For research purposes only
