

Datasheet: MCA2784GA

BATCH NUMBER 153045

Description:	MOUSE ANTI HUMAN BETA-2 ADRENERGIC RECEPTOR
Specificity:	BETA-2 ADRENERGIC RECEPTOR
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	R11E1
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen			▪	
Immunohistology - Paraffin	▪			
ELISA	▪			
Immunoprecipitation	▪			
Western Blotting			▪	
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Species Cross Reactivity	Does not react with: Mouse, Rat
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	Purified human Beta-2 adrenergic receptor.
External Database Links	<p>UniProt:</p> <p>P07550 Related reagents</p> <p>Entrez Gene:</p> <p>154 ADRB2 Related reagents</p>
Synonyms	ADRB2R, B2AR
RRID	AB_10844207
Fusion Partners	Cells from immunised Balb/c mice were fused with cells of the X63Ag8.653 myeloma cell line.
Specificity	<p>Mouse anti Human beta-2 Adrenergic Receptor antibody, clone R11E1 recognizes human beta 2 adrenergic receptor (beta2AR), a member of the G protein-coupled receptor superfamily. Beta1 and Beta2 adrenergic receptors are functionally similar but have different affinities for the ligands adrenaline and noradrenaline. B2A receptors co-exist with the B1A receptors but one subtype usually predominates. B2A receptors have a higher affinity for adrenaline and mediate the relaxation of smooth muscle including bronchus, intestine & uterus. They are located presynaptically in the nerves, where they facilitate neurotransmitter release in the brain and regulate a variety of physiological processes. Ligand binding of the B2A receptor leads to the activation of adenylyl cyclase through interaction with the GTP-binding protein Gs.</p>
Flow Cytometry	<p>Use 10ul of the suggested working dilution to label 1x10⁶ cells in 100ul.</p> <p>MCA2784GA performs best when used with a biotinylated secondary anti mouse IgG antibody such as STAR11B, followed by Streptavidin:FITC (STAR2B).</p>
Further Reading	<p>1. Frielle, T. <i>et al.</i> (1989) Properties of the beta 1- and beta 2-adrenergic receptor subtypes revealed by molecular cloning. Clin Chem. 35 (5): 721-5.</p>
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA2784GA 10040
