| Specificity | Mouse anti Bovine Coronavirus Surface Antigen antibody, clone 5A4 recognizes the surface antigen of bovine coronavirus. Bovine coronavirus (BCoV) causes severe diarrhoea in newborn calves, possibly resulting in death. It is also associated with winter dysentery in adult cattle and respiratory infections in calves and cattle. The surface antigen (also known as Spike glycoprotein, and historically as the peplomer) plays a fundamental role in viral attachment and entry into the host cell. |
