**Specificity**   **Mouse anti Human CD14 antibody, clone 61D3** recognizes human CD14, otherwise known as monocyte differentiation antigen. It is a ~40 kDa protein found on cell surfaces, particularly macrophages. CD14 acts as a co-receptor (along with the Toll-like receptor TLR 4 and MD-2) to mediate the innate immune response to bacterial lipopolysaccharide.

---

**Flow Cytometry**   Use 10ul of the suggested working dilution to label 10<sup>6</sup> cells or 100ul whole blood.
