

# Datasheet: MCA2806SBB675

**BATCH NUMBER 64585479**

<b>Description:</b>	MOUSE ANTI HUMAN CD69:StarBright Blue 675
<b>Specificity:</b>	CD69
<b>Other names:</b>	AIM
<b>Format:</b>	StarBright Blue 675
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	FN50
<b>Isotype:</b>	IgG1
<b>Quantity:</b>	100 TESTS/0.5ml

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human								
Species Cross Reactivity	Reacts with: Baboon, Chimpanzee, Cynomolgus monkey, Rhesus Monkey, Macaque <b>N.B.</b> Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.								
Product Form	Purified IgG conjugated to StarBright Blue 675 - liquid								
Max Ex/Em	<table><tr><th>Fluorophore</th><th>Excitation Max (nm)</th><th>Emission Max (nm)</th></tr><tr><td>StarBright Blue 675</td><td>476</td><td>675</td></tr></table>	Fluorophore	Excitation Max (nm)	Emission Max (nm)	StarBright Blue 675	476	675		
Fluorophore	Excitation Max (nm)	Emission Max (nm)							
StarBright Blue 675	476	675							
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant								

<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> ) 1% Bovine Serum Albumin 0.1% Pluronic F68 0.1% PEG 3350 0.05% Tween 20
<b>Immunogen</b>	Activated human B-cells.
<b>External Database Links</b>	<b>UniProt:</b> <a href="#">Q07108</a> <a href="#">Related reagents</a>  <b>Entrez Gene:</b> <a href="#">969</a> CD69 <a href="#">Related reagents</a>
<b>Synonyms</b>	CLEC2C
<b>Specificity</b>	<p><b>Mouse anti Human CD69 antibody, clone FN50</b> recognizes the human early activation antigen CD69, also known as activation inducer molecule (AIM), Early T-cell activation antigen p60, EA1 or MLR-3. CD69 is a 199 amino acid single pass type II transmembrane glycoprotein of ~30 kDa containing a single <a href="#">C-type lectin domain</a> and a single potential <a href="#">N-glycosylation site</a>. CD69 is expressed as a disulphide bond linked homodimer of ~60 kDa (<a href="#">López-Cabrera et al. 1993</a>).</p> <p>CD69 is a marker of early activation expressed by B and T lymphocytes, natural killer cells(<a href="#">Werfel 1997</a>), neutrophils, thymocytes and platelets (<a href="#">Gaviol et al. 1992</a>). Expression of CD69 is rapidly induced on activation by infection or chronic inflammation (<a href="#">Sancho et al. 2005</a>). Multiple dimeric glycoforms of CD69 can be formed through differential glycosylation of the monomeric subunits (<a href="#">Vance et al. 1997</a>).</p> <p>Mouse anti Human CD69 , clone FN50 is useful for the detection of CD69 by flow cytometry and immunohistochemistry on frozen tissue sections.</p>
<b>Flow Cytometry</b>	Use 5ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
