

Datasheet: MCA2808C

BATCH NUMBER 171024

Description:	MOUSE ANTI HUMAN CD25:RPE-Cy5
Specificity:	CD25
Other names:	IL-2R ALPHA CHAIN
Format:	RPE-CY5
Product Type:	Monoclonal Antibody
Clone:	BC96
Isotype:	IgG1
Quantity:	100 TESTS/0.5ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species

Human

Species Cross Reactivity

Reacts with: Cynomolgus monkey, Rhesus Monkey

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG conjugated to RPE-Cy5 - liquid

Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)
	RPE-Cy5 488nm laser	496	667

Preparation

Purified IgG prepared by affinity chromatography

Buffer Solution

Phosphate buffered saline

Preservative	0.09% Sodium Azide
Stabilisers	0.2% Bovine Serum Albumin

Specificity	<p>Mouse anti Human CD25 antibody, clone BC96 recognizes the human CD25 cell surface antigen, also known as the Interleukin-2 receptor subunit alpha or TAC antigen.</p> <p>CD25 is derived from a 272 amino acid precursor to yield a 251 amino acid monomeric receptor of ~53kDa which acts as the low affinity receptor for IL-2. CD25 can also form a heterodimer with CD122 to form the high affinity receptor for IL-2. CD25 is expressed by activated lymphocytes (Jackson et al. 1990, Butcher et al. 1990). Defects in CD4+ CD25+ regulatory T cells have been implicated in the pathogenesis of autoimmune diabetes (Lindley et al. 2005) and other autoimmune conditions (Sakaguchi et al. 1995).</p>
Flow Cytometry	Use 5ul of the suggested working dilution to label 10 ⁶ cells or 100ul whole blood.
