

Datasheet: MCA2831

| | |
|----------------------|---|
| Description: | MOUSE ANTI SALMONELLA PARATYPHI A LPS GROUP A 0-2 ANTIGEN |
| Specificity: | SALMONELLA PARATYPHI A LPS GROUP A 0-2 ANTIGEN |
| Other names: | O-ANTIGEN |
| Format: | Purified |
| Product Type: | Monoclonal Antibody |
| Clone: | 10B10G |
| Isotype: | IgG1 |
| Quantity: | 0.2 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry | | | ■ | |
| Immunohistology - Frozen | | | ■ | |
| Immunohistology - Paraffin | | | ■ | |
| ELISA | ■ | | | |
| Western Blotting | | | ■ | |
| Immunofluorescence | ■ | | | |
| Immunoblotting | ■ | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using the appropriate negative/positive controls.

| | |
|---------------------------------------|---|
| Target Species | Bacterial |
| Product Form | Purified IgG - liquid |
| Preparation | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant |
| Buffer Solution | Phosphate buffered saline |
| Preservative Stabilisers | 0.09% Sodium Azide (NaN ₃) |
| Approx. Protein Concentrations | IgG concentration 1.0mg/ml |
| Immunogen | Heat inactivated cells of <i>Salmonella paratyphi A</i> . |
| RRID | AB_1125359 |

Fusion Partners Spleen cells from immunised Balb/c mice were fused with cells of Sp2/0 the myeloma cells.

Specificity **Mouse anti Salmonella paratyphi A LPS Group A 0-2 Antigen antibody, clone 10B10G** recognizes the O antigen of *Salmonella enterica*, serovar paratyphi A (also known as *S. paratyphi*). The O antigen is a polysaccharide that extends from the core oligosaccharide, which itself is attached to lipid A. These three components together form the lipopolysaccharide (LPS), a major component of the outer membrane of Gram-negative bacteria. The LPS is an endotoxin and induces a strong immune response from the host. Its mutation or removal results in the death of the bacterial cell and as such is a prime target for antimicrobial drugs. The O antigen is the outermost component of the LPS and functions as a receptor for bacteriophages. It is also important in the immune response of the host. Considerable diversity is seen within *Salmonella* O antigens.

Salmonella enterica, serovar paratyphi A belongs to serogroup A of Salmonella and causes paratyphoid fever, which is similar to typhoid fever but more benign.

Mouse anti Salmonella paratyphi A LPS Group A 0-2 Antigen antibody, clone 10B10G recognizes the 0-2 antigenic determinant of *Salmonella* serogroup A and does not cross-react with the LPS of serogroups B, D or E of *Salmonella* spp.

Storage Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
