

Datasheet: MCA2832

| | |
|----------------------|--|
| Description: | MOUSE ANTI SALMONELLA BROAD REACTIVITY |
| Specificity: | SALMONELLA BROAD REACTIVITY |
| Format: | Purified |
| Product Type: | Monoclonal Antibody |
| Clone: | 5D12A |
| Isotype: | IgG1 |
| Quantity: | 0.2 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry | | | ▪ | |
| Immunohistology - Frozen | | | ▪ | |
| Immunohistology - Paraffin | | | ▪ | |
| ELISA | ▪ | | | |
| Immunoprecipitation | | | ▪ | |
| Western Blotting | | | ▪ | |
| Immunofluorescence | ▪ | | | |
| Immunoblotting | ▪ | | | |

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

| | |
|---------------------------------|---|
| Target Species | Bacterial |
| Product Form | Purified IgG - liquid |
| Preparation | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant |
| Buffer Solution | Phosphate buffered saline |
| Preservative Stabilisers | <0.1% Sodium Azide (NaN ₃) |

| | |
|---------------------------------------|---|
| Approx. Protein Concentrations | IgG concentration 1.0mg/ml |
| Immunogen | Heat inactivated <i>Salmonella paratyphi</i> . |
| RRID | AB_1125358 |
| Fusion Partners | Spleen cells from immunized Balb/c mice were fused with cells of the NS0/1, a subclone of the P3X63Ag8 myeloma cell line. |
| Specificity | <p>Mouse anti Salmonella Broad Reactivity antibody, clone 5D12A recognizes the core antigen of <i>Salmonella enterica</i>, serogroups A, B, C₁, C₂, D, E₁ and E₂. The core antigen bears the O antigen and is attached to lipid A. These three components together form the lipopolysaccharide (LPS), a major component of the outer membrane of Gram-negative bacteria. The LPS is an endotoxin and induces a strong immune response from the host. Its mutation or removal results in the death of the bacterial cell and as such is a prime target for antimicrobial drugs.</p> <p><i>Salmonella enterica</i>, causes typhoid fever, paratyphoid fever and foodborne illnesses.</p> <p>Mouse anti Salmonella Broad Reactivity antibody, clone 5D12A cross-reacts with serogroup A (<i>S. paratyphi</i> A), serogroup B (<i>S. typhimurium</i>), serogroup C₁ (<i>S. choleraesuis</i>), serogroup C₂ (<i>S. newport</i>), serogroup D (<i>S. enteritidis</i>), serogroup E₁ (<i>S. anatum</i>) and serogroup E₂ (<i>S. selandia</i>). It does not cross-react with <i>Escherichia coli</i> 055:B5, <i>E. coli</i> K12 or <i>Klebsiella pneumoniae</i>.</p> |

| Storage | <p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p> |
| Guarantee | 12 months from date of despatch |
