

Datasheet: MCA2850

Description:	MOUSE ANTI HANTAVIRUS PUUMALA VIRUS
Specificity:	HANTAVIRUS PUUMALA VIRUS
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	PG10
Isotype:	IgG2a
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting			▪	
Functional Assays	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Viral
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein	IgG concentration 1.0mg/ml

Concentrations

Immunogen	Lysate of virus-infected cells.
------------------	---------------------------------

RRID	AB_1125320
-------------	------------

Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the Sp2/0 myeloma cell line.
------------------------	---

Specificity	<p>Mouse anti Hantavirus Puumala Virus antibody, clone PG10 recognizes the Puumala virus, a species of Hantavirus that causes haemorrhagic fever with renal syndrome (HFRS) in Russia, Asia and Europe. The Puumala virus causes a mild form of HFRS also called nephropathia epidemica characterised by fever, conjunctival infections, thrombocytopenia and transient renal failure. Puumala is an enveloped virus with a segmented, single-stranded RNA genome. The virus is carried and transmitted by the bank vole <i>Clethrionomys glareolus</i> in which the virus causes a life-long persistent infection.</p> <p>Mouse anti Hantavirus Puumala Virus antibody, clone PG10 does not cross-react with Dobrava, Hanta and Seoul viruses. The antibody has virus-neutralising activity.</p>
--------------------	--

Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
----------------	--

Guarantee	18 months from date of despatch.
------------------	----------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: 10040: https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
--------------------------------------	---

Regulatory	For research purposes only
