

Datasheet: MCA2860

BATCH NUMBER 160375

Description:	MOUSE ANTI INFLUENZA B MATRIX PROTEIN M1
Specificity:	INFLUENZA B MATRIX PROTEIN M1
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	InB4
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Viral
Product Form	Purified IgG - liquid
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Influenza B virus derived from allantoic fluid of 10 day old embryonated eggs.

RRID	AB_1221634
Specificity	Mouse anti Influenza B Matrix Protein M1 antibody, clone InB4 recognizes the matrix protein (M1) of Influenza virus B. The M1 protein, a ~27 kDa membrane-binding protein, is the most abundant protein in the virus particle and forms the major structural component of the virion, beneath a lipid envelope containing the viral haemagglutinin and neuraminidase glycoproteins and the M2 ion channel. M1 controls the intracellular trafficking of ribonucleoproteins and is also essential for virus budding. The protein can also dimerise under certain conditions.
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA2860 10040
Regulatory	For research purposes only
