

Datasheet: MCA3315Z

Description:	MOUSE ANTI HUMAN PARKIN:Preservative Free
Specificity:	PARKIN
Format:	Preservative Free
Product Type:	Monoclonal Antibody
Clone:	1H4
Isotype:	IgG3
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			0.1 - 10 ug/ml
Immunofluorescence	▪			0.1 - 10 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Approx. Protein Concentrations	Ig concentration 0.5 mg/ml
Immunogen	Recombinant protein corresponding to aa 288-388 of human PARK2
External Database Links	UniProt:

Entrez Gene:

Synonyms	PRKN
-----------------	------

RRID	AB_2159924
-------------	------------

Fusion Partners	Spleen cells from Balb/c mice were fused with cells from the Sp2/0 myeloma cell line.
------------------------	---

Specificity	<p>Mouse anti Human Parkin antibody, clone 1H4 recognizes human E3 ubiquitin-protein ligase parkin, also known as Parkin or Parkinson juvenile disease protein 2. Parkin is a 465 amino acid ~ 50 kDa enzymatic component of a multiprotein E3 ubiquitin ligase complex.</p> <p>Mutations in the PARK2 gene has been noted to affect susceptibility to Parkinson's disease (PARK) and development of Parkinson disease 2, also known as autosomal recessive juvenile Parkinsonism (PARK2) which differs from classical Parkinson disease by early DOPA-induced dyskinesia, diurnal fluctuation of the symptoms, sleep benefit, dystonia and hyper-reflexia (Kitada et al. 1998).</p>
