

# Datasheet: MCA403 BATCH NUMBER 164862

Description:	MOUSE ANTI INFLUENZA B NUCLEOPROTEIN		
Specificity:	INFLUENZA B NUCLEOPROTEIN		
Format:	Purified		
Product Type:	Monoclonal Antibody		
Clone:	B017 (B35G)		
Isotype:	lgG2b		
Quantity:	1 mg		

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further							
	information. For general protocol recommendations, please visit <u>www.bio-</u>							
	rad-antibodies.com/protocols.							
		Yes	No	Not Determined	Suggested Dilution			
	Flow Cytometry			-				
	Immunohistology - Frozen			-				
	Immunohistology - Paraffin	-						
	ELISA	-		-				
	Immunoprecipitation			-				
	Western Blotting	-						
	Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.							
Target Species	Viral							
Product Form	Purified IgG - liquid							
Preparation	Purified IgG prepared by affinity chromatography from tissue culture supernatant.							
Buffer Solution	Phosphate buffered saline							
Preservative Stabilisers	<0.1% Sodium Azide (NaN <sub>3</sub> )							
Approx. Protein	IgG concentration 1.0 mg	g/ml						

#### Concentrations

Immunogen	Influenza B/Lee/40 and B/Singapore/-222/79 viruses.
RRID	AB_2298473
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the P3 Ag8.653 mouse myeloma cell line.
Specificity	Mouse anti Influenza B Nucleoprotein antibody, clone B017 recognises an epitope within the nucleoprotein of influenza B virus.
	The influenza viruses, classified as type A, B and C, are members of the <i>Orthomyxoviridae</i> family which differ in their epidemiology and host ranges and lack serological cross-reactivity of their internal components, especially their matrix proteins and nucleoprotein. Influenza B virus is a slow-mutating single stranded RNA virus subject to antigenic drift which, although enough to prevent lasting immunity, prevents influenza B from causing pandemics.
	Mouse anti Influenza B Nucleoprotein antibody, clone B017 can be used in influenza B IFA typing in conjunction with <u>MCA2717</u> (clone B114).

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Guarantee	12 months from date of despatch
Health And Safety	Material Safety Datasheet documentation #10040 available at:

Information	https://www.bio-rad-antibodies.com/SDS/MCA403 10040
Regulatory	For research purposes only
