

Datasheet: MCA4638T

Description:	MOUSE ANTI HUMAN CD262
Specificity:	CD262
Other names:	DR5, TRAIL-R2
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	DJR2-4
Isotype:	IgG1
Quantity:	25 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			1/10 - 1/20
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting			▪	
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein	IgG concentration 0.5mg/ml

Concentrations

Immunogen Extracellular domain of DR5-human IgG1 Fc fusion protein.

RRID AB_2204936

Specificity **Mouse anti Human CD262 antibody, clone DJR2-4**recognises human CD262, also known as Death receptor 5 (DR5) and TNF-related apoptosis-inducing ligand receptor 2 (TRAIL-R2). It is a ~55 kDa member of the TNF receptor superfamily binding tumor necrosis factor-related apoptosis inducing ligand (TNFSF10, TRAIL or APO-2L). Once activated, this receptor induces a cascade of caspases resulting in apoptosis. FADD, a death domain containing adaptor protein is required for apoptosis mediated by DR5. DR5 is widely expressed in adult and fetal tissues. Staining may be enhanced with the use of a sensitive, three-layer staining technique.

Flow Cytometry Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul.

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee Guaranteed until date of expiry. Please see product label.
