

Datasheet: MCA4680

BATCH NUMBER 168120

| | |
|----------------------|-----------------------------|
| Description: | MOUSE ANTI HUMAN FACTOR VII |
| Specificity: | FACTOR VII |
| Format: | Purified |
| Product Type: | Monoclonal Antibody |
| Clone: | RFF-VII/2 |
| Isotype: | IgG1 |
| Quantity: | 0.5 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry | | | ▪ | |
| Immunohistology - Frozen | | | ▪ | |
| Immunohistology - Paraffin | | | ▪ | |
| ELISA | ▪ | | | |
| Immunoprecipitation | | | ▪ | |
| Western Blotting (1) | ▪ | | | |
| Radioimmunoassays | ▪ | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)MCA4680 binds to a conformational epitope and will not bind to reduced Factor VII.

| | |
|------------------------|---|
| Target Species | Human |
| Product Form | Purified IgG - liquid |
| Preparation | Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant |
| Buffer Solution | Phosphate buffered saline |
| Preservative | 0.09% Sodium Azide (NaN ₃) |

Stabilisers

Carrier Free Yes

Approx. Protein Concentrations IgG concentration 1.0mg/ml

Immunogen Purified Factor VII.

Fusion Partners Spleen cells from immunised Balb/c mice were fused with cells of the P3-NS/1-Ag 4 mouse myeloma cell line.

Specificity

Mouse anti Human Factor VII antibody, clone RFF-VII/2 recognizes Factor VII, a serine protease found circulating in the blood. It initiates the extrinsic pathway of blood coagulation in conjunction with tissue factor. Tissue factor is found on the outside of blood vessels. When the vessels is damaged, tissue factor is exposed to the blood and circulating Factor VII. Once bound to tissue factor, Factor VII is activated by different proteases and converts Factor IX to IXa. Factor VII deficiency ([FA7D](#)) is a rare hereditary haemorrhagic disease. Symptoms range from mild to severe.

Mouse anti Human Factor VII antibody, clone RFF-VII/2 may be used as a capture antibody in immunoassays for Factor VII in combination with Mouse anti Human Factor VII antibody, clone RFF-VII/1 ([MCA4681](#)) as a detection reagent.

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee 12 months from date of despatch
