

Datasheet: MCA4697T

Description:	MOUSE ANTI HUMAN TREM-1
Specificity:	TREM-1
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	TREM-37
Isotype:	IgG2b
Quantity:	25 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			1ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 0.5mg/ml

Immunogen Recombinant human TREM-1.

Specificity

Mouse anti Human Trem-1 antibody, clone TREM-37 recognizes triggering receptor expressed on myeloid cells 1 also known as TREM-1, Triggering receptor expressed on monocytes 1 or CD354. Trem-1 is a 214 amino acid ~22 kDa single pass type 1 transmembrane immune receptor expressed on CD14⁺ monocytes, macrophages and neutrophils, highly expressed in inflammatory lesions caused by fungi and bacteria. It stimulates neutrophil and monocyte-mediated inflammatory responses. TREM-1 activation, together with LPS and other PRR ligands, amplifies the production pro-inflammatory cytokines and thus the inflammatory response. TREM-1 also plays a crucial role in the mediation of septic shock ([Bouchon et al. 2001](#)).

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee

12 months from date of despatch

Health And Safety Information

Material Safety Datasheet documentation #10040 available at: 10040: <https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf>
