

Datasheet: MCA4737 BATCH NUMBER 170130

| Description: | MOUSE ANTI CLOSTRIDIUM DIFFICILE TOXIN B |
|---------------|--|
| Specificity: | CLOSTRIDIUM DIFFICILE TOXIN B |
| Format: | Purified |
| Product Type: | Monoclonal Antibody |
| Clone: | 5156 |
| Isotype: | lgG1 |
| Quantity: | 0.1 mg |
| | |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry | | | • | |
| Immunohistology - Frozen | | | | |
| Immunohistology - Paraffin | | | | |
| ELISA | • | | | 1/20 - 1/200 |
| Immunoprecipitation | | | | |
| Western Blotting | | | | |
| Immunofluorescence | | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| Target Species | Bacterial | |
|-----------------------------|---|-----------------------|
| Product Form | Purified IgG - liquid | |
| Preparation | Purified IgG prepared by affinity chromatography on Protein A supernatant | A from tissue culture |
| Buffer Solution | Phosphate buffered saline | |
| Preservative Stabilisers | 0.1% Sodium Azide (NaN ₃) | |

| Approx. Protein Concentrations | IgG concentration 0.1mg/ml | | |
|-----------------------------------|---|--|--|

| Synonyms | tcdB | | |
| RRID | AB_1658139 | | |
| Specificity | Mouse anti Clostridium difficile Toxin B antibody, clone 5156 recognizes Clostridium difficile toxin B. No reaction is observed with toxin A. Clostridium difficile is a gram-positive motile bacterium which is the leading cause of diarrhoea in developed countries. The incidence of disease in humans varies greatly with age, spore density and the administration of antibiotics. Toxin B (TcdB) is a large exotoxin. Its role in disease is less well understood than that of toxin A, though it seems clear that TcdB contributes to disease. Both toxins modify the Ras superfamily of small GTPases via glycosylation, inactivating them and leading to the disruption of vital signaling pathways in the cell. | | |

| Storage | Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use. | | |
| Guarantee | 12 months from date of despatch | | |
