

Datasheet: MCA4755

Description:	MOUSE ANTI HUMAN CD205
Specificity:	CD205
Other names:	DEC205
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	HD30
Isotype:	IgG1
Quantity:	0.2 mg

Product Details

RRID AB_2137648

Applications This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			1/10 - 1/200
Immunohistology - Frozen	▪			
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species Human

Species Cross Reactivity Reacts with: Monkey
Does not react with: Mouse
N.B. Antibody reactivity and working conditions may vary between species.

Product Form Purified IgG - liquid

Preparation Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant

Buffer Solution Phosphate buffered saline

Preservative Stabilisers 0.09% Sodium Azide (NaN₃)
1% Bovine Serum Albumin

Approx. Protein IgG concentration 1.0 mg/ml

Concentrations

Immunogen Purified extracellular domain of human CD205-IgG1 Fc fusion protein.

Synonyms CD205, CLEC13B

Fusion Partners Spleen cells from immunised mice were fused with cells of the mouse SP2/0-Ag14 myeloma cell line.

Specificity **Mouse anti Human CD205 antibody, clone HD30** recognizes human Lymphocyte antigen 75, otherwise known as CD205, DEC205, C-type lectin domain family 13 member B or gp200-MR6. CD205 is a 1695 amino acid ~205 kDa single pass type I transmembrane glycoprotein and member of the macrophage mannose receptor family of C-type lectins, predominantly expressed by human dendritic cells.

CD205 is a recycled endocytic receptor involved in directing antigen uptake for processing and presentation by MHC class I. Multiple isoforms of human CD205, generated by alternative splicing have been described. Mouse anti Human CD205 antibody, clone HD30 recognizes the canonical isoform 4, reactivity with other isoforms has not been evaluated but both isoforms 2 and 3 contain most of the immunogen sequence used to generate clone HD30 making reactivity likely. However the antibody is not expected to be reactive with isoforms 1 and 5 which lack the immunogen sequence ([UniProt : 060449](#)).

Flow Cytometry Use 10ul of suggested working dilution 10⁶ cells in 100ul.

Histology Positive Control Tissue Human or monkey spleen and lymph node.

References 1. Park, C.G. *et al.* (2012) Generation of anti-human DEC205/CD205 monoclonal antibodies that recognize epitopes conserved in different mammals. [J Immunol Methods. 377 \(1-2\): 15-22.](#)

Storage Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 18 months from date of despatch.
