

Datasheet: MCA4756GT

Description:	RAT ANTI HUMAN AID
Specificity:	AID
Other names:	ACTIVATION-INDUCED CYTIDINE DEAMINASE
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	EK2-5G9
Isotype:	IgG2b
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry (1)	▪			
Immunohistology - Frozen			▪	
Immunohistology - Paraffin (2)	▪			
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) Membrane permeabilisation is required for this application. Bio-Rad recommends the use of Leucoperm™ (Product Code [BUF09](#)) for this purpose.

(2) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. EDTA pH8.0 is recommended for this purpose.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant

Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Synthetic peptide corresponding to amino acids 185-198 of human AID.
External Database Links	<p>UniProt: Q9GZX7 Related reagents</p> <p>Entrez Gene: 57379 AICDA Related reagents</p>
Synonyms	AID
RRID	AB_2224241
Fusion Partners	Spleen cells from Long Evans rats were fused with cells of the P3X63-Ag8.653 myeloma cell line.
Specificity	<p>Rat anti Human AID antibody, clone EK2-5G9 recognizes human Single-stranded DNA cytosine deaminase, also known as Activation-induced cytidine deaminase or Cytidine aminohydrolase. AID is a 198 amino acid ~24 kDa RNA-editing enzyme essential for the initiation of immunoglobulin class switch recombination, somatic hypermutation and gene conversion.</p> <p>AID is selectively expressed by germinal centre B cells and B cell-derived lymphomas (Basso et al. 2012). Mutation in the AICDA gene is responsible for the autosomal recessive condition Immunodeficiency with hyper-IgM 2 (HIGM2) A rare immunodeficiency syndrome characterized by normal or elevated serum IgM levels with absence of IgG, IgA, and IgE resulting in extreme susceptibility to bacterial infection.</p>
Flow Cytometry	Use 10ul of the suggested working dilution to label 1x10 ⁶ cells in 100ul.
Histology Positive Control Tissue	Germinal centre B cells
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>This product should be stored undiluted.</p> <p>Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>

Guarantee 12 months from date of despatch
