<b>Specificity</b>	<b>Mouse anti Human IL-1 beta, clone 2E8</b> recognizes human interleukin-1 $\beta$ , also known as catabolin. IL-1 $\beta$ is a 153 amino acid ~18 kDa with an additional 116 propeptide region, cleaved in the mature form. IL-1 $\beta$ is a potent proinflammatory cytokine released by activated macrophages as a ~35 proprotein which is then cleaved by caspase-1 to yield the active cytokine ( <a href="#">Andrei et al. 2004</a> ).
<b>Storage</b>	Store at -20°C only. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
