

Datasheet: MCA5641P

Description:	MOUSE ANTI LIPOPROTEIN LIPASE:HRP
Specificity:	LIPOPROTEIN LIPASE
Format:	HRP
Product Type:	Monoclonal Antibody
Clone:	5D2
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	-			
Immunoprecipitation	-			
Western Blotting	-			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Bovine
Species Cross Reactivity	Reacts with: Rat, Human, Chicken, Guinea Pig Does not react with:Mouse N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.
Product Form	Purified IgG conjugated to Horseradish Peroxidase (HRP) - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	0.0095% MIT			
Approx. Protein Concentrations	IgG concentration 1.0mg/ml			
Immunogen	Purified bovine milk lipoprotein lipase.			
External Database Links	UniProt: P11151 Related reagents			
	Entrez Gene: 280843 LPL Related reagents			
RRID	AB_10963722			
Specificity	Mouse anti lipoprotein lipase antibody, clone 5D2 recognizes an epitope within amino acids 380-410 of lipoprotein lipase (LPL), a member of the AB hydrolase superfamily, which plays a pivotal role in lipoprotein metabolism and transport, acting as the key enzyme in the hydrolysis of triglycerides and very low density lipoproteins (VLDLs), and the release of free fatty acids into peripheral tissues.			
	A deficiency of LPL can result in hypertriglyceridemia, and LPL plays a critical role in the pathogenesis of atherosclerosis, and in particular the relationship between LPL and apolipoprotein E (ApoE), both of which are secreted in significant amounts by macrophages in developing arterial wall lesions.			
	Mouse anti Lipoprotein lipase antibody, clone 5D2 is a unique antibody which differentiates between monomeric inactive and dimeric active LPL, and binds to LPL sequences involved in LPL, LPL receptor, and heparin interactions. Mouse anti Lipoprotein lipase antibody, clone 5D2 inhibits the activity of human LPL (Chang et al. 1998).			
ELISA	MCA5641P can be used in a direct ELISA, or as the detection reagent in a sandwich ELISA with MCA5641 or MCA5641GA as the capture antibody.			
Western Blotting	MCA5641P detects a band of approximately 53kDa using partially purified LPL from postheparin plasma.

activity, and is modulated by glycosaminoglycans. <u>J Biol Chem. 275 (38): 29324-30.</u>

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for

short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in

frost-free freezers is not recommended.

Guarantee 12 months from date of despatch
