

Datasheet: MCA5646GA

Description:	RAT ANTI MOUSE CD276
Specificity:	CD276
Other names:	B7-H3
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	MJ8
Isotype:	IgG2b
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	■			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Mouse
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
Immunogen	Mouse IgG2a Fc-CD276 (aa 1-242).

RRID	AB_10850448
-------------	-------------

Fusion Partners	Lymph node cells from immunised Sprague Dawley rats were fused with cells of the P3U1 myeloma cell line.
------------------------	--

Specificity	<p>Rat anti Mouse CD276 antibody, clone MJ8 recognizes mouse CD276, otherwise known as B7-H3, a ubiquitously expressed transmembrane glycoprotein and member of the B7 family of co-stimulatory molecules, which acts as both a positive and negative regulator of T-cell-mediated immune responses.</p> <p>CD276 is highly expressed in bone during embryogenesis, and can be induced on dendritic cells and monocytes by inflammatory cytokines. CD276 has been implicated in the development of acute and chronic transplant rejection, and is reported to have therapeutic potential as a regulator of cell-mediated immune responses to cancer, particularly in conjunction with anti-angiogenic therapy. In mice, CD276 has been linked with the development of pathogenic Th2 cells during the induction phase of allergic asthma (Nagashima et al. 2008).</p>
--------------------	--

Flow Cytometry	Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul.
