

# Datasheet: MCA5656PE BATCH NUMBER 152433

Description:	MOUSE ANTI BOVINE MHC CLASS II DR:RPE
Specificity:	MHC CLASS II DR
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	CC108
Isotype:	lgG1
Quantity:	100 TESTS

# **Product Details**

Applications	This product has been derived from testing w communications from information. For gener rad-antibodies.com/pro	tions or personal dicated for further					
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry	• • •			Neat		
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.						
Target Species	Bovine						
Product Form	Purified IgG conjugated to R. Phycoerythrin (RPE) - Iyophilized						
Reconstitution	Reconstitute with 1.0ml distilled water						
Max Ex/Em	Fluorophore	Excitation M	ax (nm)	Emission Max (nm)			
	RPE 488nm laser	496		578			
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant						
Buffer Solution	Phosphate buffered saline						
Preservative Stabilisers	0.09% Sodium Azide ( 1% Bovine Serum Alb						
	5% Sucrose	umm					

External Database	l la Duch

RRID	AB_11152779					
Fusion Partners	Spleen cells from immunized BALB/c mice were fused with cells of the Mouse NS1 myeloma cell line.					
Specificity	<b>Mouse anti Bovine MHC class II DR antibody, clone CC108</b> recognizes Bovine MHC Class II DR. MHC Class II molecules are constitutively expressed on antigen presenting cells such as dendritic cells, B lymphocytes, monocytes, macrophages, activated T lymphocytes and may be induced on a range of other cell types by interferon gamma.					
	The major histocompatibility complex (MHC) is a cluster of genes some of which are important in the immune response to infections. In cattle, this complex is referred to as the bovine leukocyte antigen (BoLA) region. There are 2 major types of MHC class IIa molecules encoded by the BoLA which are DR and DQ each composed of an alpha and beta chain.					
Flow Cytometry	Use 10ul of the suggested working dilution to label 1x10 <sup>6</sup> cells in 100ul.

Storage	Prior to reconstitution store at +4°C.			
	After reconstitution store at +4°C.			
	DO NOT FREEZE. This product should be stored undiluted. This product is photosensitive			
	and should be protected from light. Should this product contain a precipitate we			
	recommend microcentrifugation before use.			
Guarantee	12 months from date of despatch			
Health And Safety	Material Safety Datasheet documentation #20487 available at:			
Information	https://www.bio-rad-antibodies.com/SDS/MCA5656PE			
	20487			
Regulatory	For research purposes only
