Specificity	<p>Mouse anti Human CD63 antibody, clone TEA3/18 recognizes the CD63 cell surface antigen, a glycoprotein of ~40-60 kDa.</p> <p>CD63 is expressed by monocytes and by a variety of cell lines. It is located intracellularly in lysosomal granules of platelets, being translocated to the surface upon activation. It may therefore be useful as a marker of platelet activation.</p>
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul or 100ul whole blood.
