

Datasheet: MCA5719G

Description:	MOUSE ANTI METHAMPHETAMINE
Specificity:	METHAMPHETAMINE
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	ME3B9
Isotype:	IgG1
Quantity:	1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Immunoassay	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Chemical
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
RRID	AB_10846825
Specificity	Mouse anti Methamphetamine antibody, clone ME3B9 recognizes methamphetamine,

a central nervous system stimulant that triggers the release of dopamine and norepinephrine in the brain. It has significant enhancing effects on the mood and energy. Medically, methamphetamine is used to treat attention deficit hyperactivity disorder, obesity and narcolepsy. Side-effects may include anorexia, restlessness, arrhythmias, heart attack or stroke.

Methamphetamine is addictive and tolerance develops quickly. Users might also use sedatives to ease anxiety and trouble sleeping. Addiction is difficult to treat, with withdrawal symptoms such as anxiety, excessive sleeping, eating and depression. Relapse rates are high.

Intended Use	Bio-Rad recommends that the user determines this product's suitability for any particular application.
---------------------	--

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
----------------	--

Guarantee	12 months from date of despatch
------------------	---------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: 10040: https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
--------------------------------------	---

Regulatory	For research purposes only
