

Datasheet: MCA5721G

Description:	MOUSE ANTI MORPHINE
Specificity:	MORPHINE
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	MO3A2
Isotype:	IgG1
Quantity:	1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Immunoassay	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Chemical
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
RRID	AB_10892676

Specificity

Mouse anti Morphine antibody, clone MO3A2 recognises Morphine, a potent opiate analgesic. It acts directly on the central nervous system and is a popular treatment for

severe pain. Tolerance to morphine develops quite rapidly. It can be taken in numerous ways, but for medical use intravenously is most common.

Morphine is extremely addictive, both physically and psychologically. Withdrawal from morphine is a long and painful process. Relapse after withdrawal is extremely common.

Intended Use	Bio-Rad recommends that the user determines this product's suitability for any particular application.
---------------------	--

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
----------------	--

Guarantee	12 months from date of despatch
------------------	---------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: 10040: https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
--------------------------------------	---

Regulatory	For research purposes only
