

Datasheet: MCA5735G

BATCH NUMBER 180627

Description:	MOUSE ANTI PHENOBARBITAL
Specificity:	PHENOBARBITAL
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	PH3
Isotype:	IgG1
Quantity:	1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Immunoassay	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Chemical
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0mg/ml
RRID	AB_10843312
Specificity	Mouse anti Phenobarbital antibody, clone PH3 recognizes phenobarbital, one of

around 12 compounds derivatised from barbituric acid. These compounds are central nervous system depressants and are commonly used as sedatives, anaesthetics, hypnotics and anticonvulsants. They can be classified into three groups: ultra-short-acting (clinically used as anaesthetics), short/intermediate-acting and long-acting (clinically used as anticonvulsants). Barbiturates are addictive and potentially very dangerous, producing feelings of tranquillity, but overdose can lead to a dramatic fall in blood pressure and body temperature, depressed respiration and coma. The short-acting barbiturates are the most favoured by recreational drug users.

Phenobarbital is the most widely used anticonvulsant, often used for long-term control of seizures, since it has a very long half-life (2-7 days).

Intended Use	Bio-Rad recommends that the user determines this product's suitability for any particular application.
Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA5735G 10040
Regulatory	For research purposes only
