<b>Specificity</b>	<p><b>Mouse anti Human myoglobin (clone 164.3A4)</b> is a monoclonal antibody recognizing human myoglobin, a single-chain globular ~17kDa protein containing a heme prosthetic group localized to skeletal muscle. Myoglobin is responsible for the storage and movement of oxygen in muscle tissue.</p> <p>Myoglobin is released from injured muscle into the bloodstream, making it a sensitive marker for all muscle injury. It is commonly used in combination with troponin as a marker for myocardial damage in heart attacks. It is filtered by the kidneys, but is a potential cause of renal failure as it is toxic to the renal tubular epithelium (<a href="#">Lima et al. 2008</a>).</p>
<b>Storage</b>	<p>Store at +4°C or at -20°C if preferred.  Storage in frost-free freezers is not recommended.  This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
