

Datasheet: MCA5950GA

BATCH NUMBER 151433

Description:	MOUSE ANTI HUMAN CD44v6
Specificity:	CD44v6
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	VFF-18
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen	▪			1.0 - 2.0ug/ml
Immunohistology - Paraffin (1)	▪			1.0 - 2.0ug/ml
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Tris/EDTA buffer pH 9.0 or Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide (NaN ₃)

Stabilisers

Approx. Protein Concentrations

IgG concentration 1.0 mg/ml

Immunogen

Glutathione S Transferase (GST) fusion protein corresponding to the variable domain v6 of human CD44.

Synonyms

LHR, MDU2, MDU3, MIC4

Fusion Partners

Spleen cells from immunized BALB/c mice were fused with cells of the P3X63Ag8.653 myeloma cell line.

Specificity

Mouse anti Human CD44v6, clone VFF-18, specifically recognizes a centrally located 14mer epitope encoded by amino acid residues 18-31, within variant exon 6 (v6) of human CD44 ([Reinisch et al. 1998](#)). CD44 is a member of a polymorphic family of transmembrane glycoproteins, which exists as a broadly expressed ~80-90 kDa standard form (CD44s), and also as numerous splice variants, due to extensive alternative splicing and post-translational modifications.

Many functional properties of CD44s have been determined, including cell adhesion, lymphocyte activation, signal transduction, haematopoiesis, recirculation and homing, and CD44v6 has been particularly implicated in leukocyte to endothelial cell attachment and rolling, as well as homing to sites of inflammation and peripheral organs.

As well as its role as a receptor for hyaluronic acid (HA), CD44s also interacts with other ligands including matrix metalloproteinases (MMPs), fibronectin and collagens, and has been linked with cancer of the breast, colon, stomach and squamous cell carcinomas (HNSCC) of the head and neck, as well as being a prognostic marker for non-Hodgkin's lymphoma.

The variant isoforms of CD44 (CD44v) are highly expressed on epithelial cells but not leukocytes, and their association with cell transformation and cancer is also well established, supported by numerous immunohistochemical studies including those looking at HNSCC. Studies looking at the role of CD44v6 in Crohn's disease, in which clone VFF-18 was generated and characterized, revealed that VFF-18 binds to CD44v6 with high affinity when compared with anti-CD44v6 clone 2F10, and is suitable for detecting CD44v6 in inflammatory bowel disease (IBD) ([Reinisch et al. 1998](#)).

Mouse anti Human CD44v6, clone VFF-18 is suitable for detecting CD44v6 in inflammatory bowel disease (IBD) ([Reinisch et al. 1998](#)).

Flow Cytometry	Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul

Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>This product should be stored undiluted.</p> <p>Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
