

Datasheet: MCA5951SBV570

# **BATCH NUMBER 100008267**

| Description:  | MOUSE ANTI PIG CD3:StarBright Violet 570 |
|---------------|--|
| Specificity:  | CD3 EPSILON                              |
| Format:       | StarBright Violet 570                    |
| Product Type: | Monoclonal Antibody                      |
| Clone:        | PPT3                                     |
| Isotype:      | lgG1                                     |
| Quantity:     | 100 TESTS/0.5ml                          |

# **Product Details**

# **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

|                | Yes | No | Not Determined | Suggested Dilution |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| Target Species              | Pig   | Pig  Does not react with:Bovine, Goat, Horse, Human, Sheep |                  |  |  |  |
|-----------------------------|---|--|------------------|--|--|--|
| Species Cross<br>Reactivity | Does not react with:E   |  |                  |  |  |  |
| Product Form                | Purified IgG conjugated to StarBright Violet 570 - liquid                             |  |                  |  |  |  |

## **Specificity**

Mouse anti Pig CD3, clone PPT3 recognizes the porcine homologue of human CD3ε, a 24 kDa single pass type I membrane protein expressed by T-lymphocytes. Clone PPT3, also known under the clone designation FY1H2, was clustered at the second international swine CD workshop and found to specifically recognise an epitope on the porcine CD3ε designated as CD3c (Pescovitz, M.D., et al. 1998).

CD3 is a multimeric protein complex composed of four distinct polypeptide chains ( $\epsilon$ ,  $\gamma$ ,  $\delta$ ,  $\zeta$ ) that assemble and function as three pairs of dimers ( $\epsilon\gamma$ ,  $\epsilon\delta$ ,  $\zeta\zeta$ ). The CD3 complex serves as a T cell co-receptor that associates non-covalently with the T cell receptor (TCR) (<u>Guy, C.S & Vignali, D.G. 2009</u>). CD3 is a defining feature of cells belonging to the T cell lineage, antibodies recognising pig CD3 therefore provide useful markers of porcine T cells.

Clone PPT3 has been demonstrated to recognise an epitope that is expressed both intracellularly and extracellularly, additionally clone PPT3 has been demonstrated to activate  $\alpha/\beta$  T-cells (<u>Kirkham P.A., et al. 1996</u>).

Clone PPT3 was tested on PBL from a range of other mammalian species and found to be negative suggesting that the epitope recognised by this clone is specific to porcine (Yang, H. *et al.* 1996).

## Flow Cytometry

Use 5µl of the suggested working dilution to label 10<sup>6</sup> cells in 100µl. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
