

Datasheet: MCA5951SBV610

BATCH NUMBER 100008128

Description:	MOUSE ANTI PIG CD3:StarBright Violet 610
Specificity:	CD3 EPSILON
Format:	StarBright Violet 610
Product Type:	Monoclonal Antibody
Clone:	PPT3
Isotype:	IgG1
Quantity:	100 TESTS/0.5ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Pig		
Species Cross Reactivity	Does not react with:Bovine, Goat, Horse, Human, Sheep		
Product Form	Purified IgG conjugated to StarBright Violet 610 - liquid		
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)
	StarBright Violet 610	403	607
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant		
Buffer Solution	Phosphate buffered saline		
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin 0.1% Pluronic F68		

0.1% PEG 3350
0.05% Tween 20

Immunogen Porcine PBMCs

Fusion Partners Lymph node cells from immunised BALB/c mice were fused with cells of the NS0 myeloma cell line

Specificity **Mouse anti Pig CD3, clone PPT3** recognizes the porcine homologue of human CD3 ϵ , a 24 kDa single pass type I membrane protein expressed by T-lymphocytes. Clone PPT3, also known under the clone designation FY1H2, was clustered at the second international swine CD workshop and found to specifically recognise an epitope on the porcine CD3 ϵ designated as CD3c ([Pescovitz, M.D., et al. 1998](#)).

CD3 is a multimeric protein complex composed of four distinct polypeptide chains (ϵ , γ , δ , ζ) that assemble and function as three pairs of dimers ($\epsilon\gamma$, $\epsilon\delta$, $\zeta\zeta$). The CD3 complex serves as a T cell co-receptor that associates non-covalently with the T cell receptor (TCR) ([Guy, C.S & Vignali, D.G. 2009](#)). CD3 is a defining feature of cells belonging to the T cell lineage, antibodies recognising pig CD3 therefore provide useful markers of porcine T cells.

Clone PPT3 has been demonstrated to recognise an epitope that is expressed both intracellularly and extracellularly, additionally clone PPT3 has been demonstrated to activate α/β T-cells ([Kirkham P.A., et al. 1996](#)).

Clone PPT3 was tested on PBL from a range of other mammalian species and found to be negative suggesting that the epitope recognised by this clone is specific to porcine ([Yang, H. et al. 1996](#)).

Flow Cytometry Use 5 μ l of the suggested working dilution to label 10⁶ cells in 100 μ l. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
